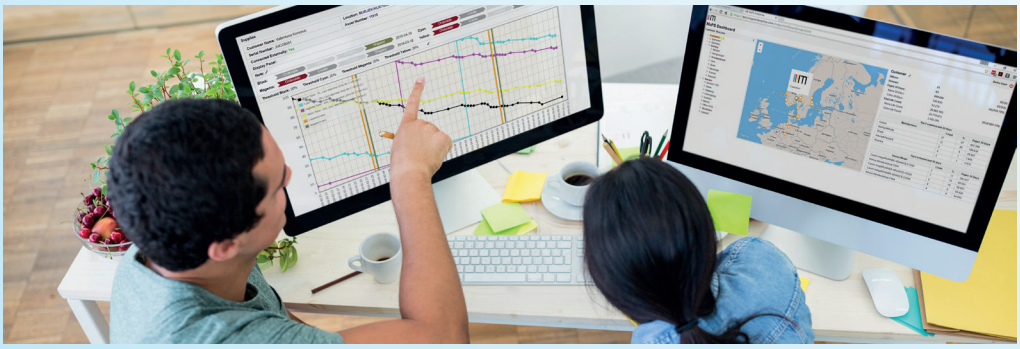
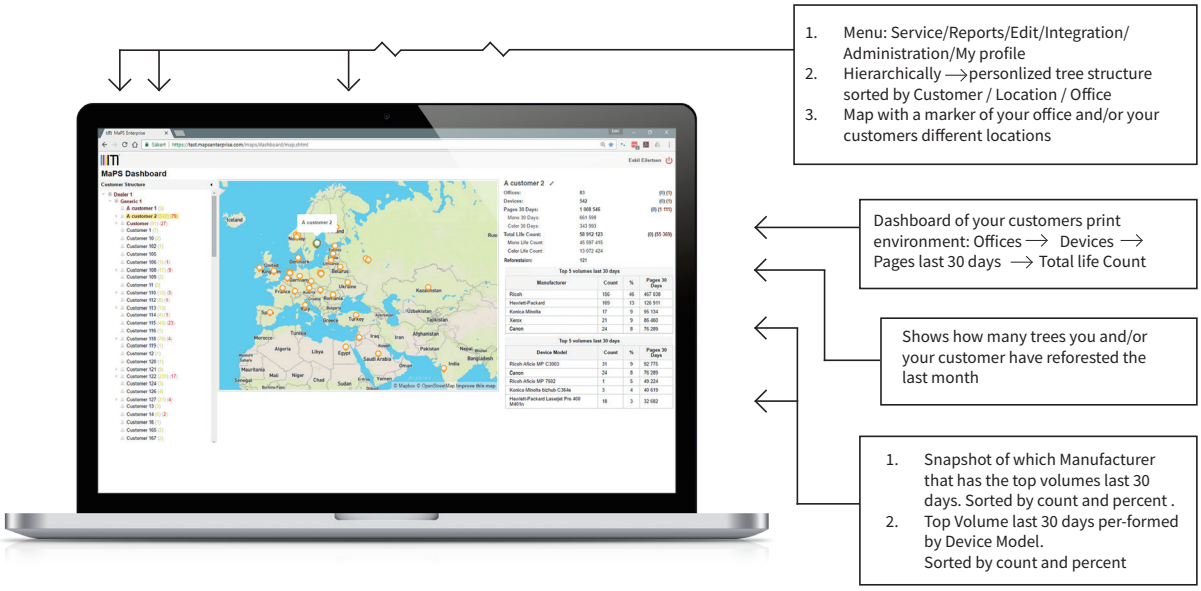
- Export data report
- Business Intelligence Tool
- Graphical interface
- Cost and Proposal module



Full Visibility - 100% Control



Unique Views

Views and reports for live checks on performance and KPI by site and alerts.

Visibility

Visibility of all devices not just on contract, enabling greater in-sight of all devices. Notifications of newly installed devices providing an alert of non authorised purchases.

Security

Mapsiot has been independently security tested against DoS attacks and unauthorized access to user and print information. Our soft-ware platform reliably, delivers business insight through infor-mation and visualization

Interactive Map

Analyzing data and finding devices is made simple using our graphical dashboards and maps.

Easy Installation

Mapsiot is fast and simple to install, no additional hardware or complex configurations. Once live, Mapsiot quickly finds devices and reports on device type, location, activity, yields giving you a graphical view of the total fleet.

From SME to Global

Mapsiot is completely scalable for managing one or two devices to thousands of devices across the globe. Mapsiot can be integrated into ERP applications using Mapsiot own API interfaces, providing a fully automated solution.

The Difference is Knowledge

Mapsiot provides simple and easy to use dashboards to manage your fleet of devices, available on the market today.

Mapsiot has a support team at your disposal. Our team will support you during installations, mapping your customer's geo-graphical locations, matching and positioning devices. We provide on-line workshops to increase your knowledge and much more. We are an asset that makes the difference!

Our Responsibility

Green Credentials

Now you can help all your customers to reforest their paper consumption where the planet needs it most. First, we measure the consumption then we calculate then we plant trees at a reforestation project of your choice.

Your Reward

All our reforestation projects provide new jobs to uplift communities and local economies where we plant trees. You can of course let all your partners and customers follow your reforestation project trough your social media channels.
